

# Siemens EDA+AI

**Danny Perng**

Senior Vice President

Siemens EDA

**SIEMENS**

# Siemens knows AI

Just a few examples of at-scale use of Siemens AI today outside of EDA

## Mobility

Schedule & route planning,  
predictive management

## Energy

Optimization of gas and wind  
turbine installations

## Industrial

Automated visual inspection,  
factory optimization

## Medical

Predictive maintenance,  
diagnostic assistance

Siemens has been **deploying AI, at-scale**, delivering significant **quality of life improvements** to people all over the globe with **over 1400 AI developers & 3700 patents**

# Siemens and NVIDIA partner to build the Industrial Metaverse

A virtual world to solve real-world problems: Siemens and NVIDIA will collaborate to enable the Industrial Metaverse and increase use of AI-driven digital twin technology that will help bring industrial automation to a new level.

# Why does EDA need AI solutions?

# The design productivity gap is a real and growing problem

1  
Trillion

Transistors in chiplet based processors by 2030

[How We'll Reach a 1 Trillion Transistor GPU - IEEE Spectrum](#)

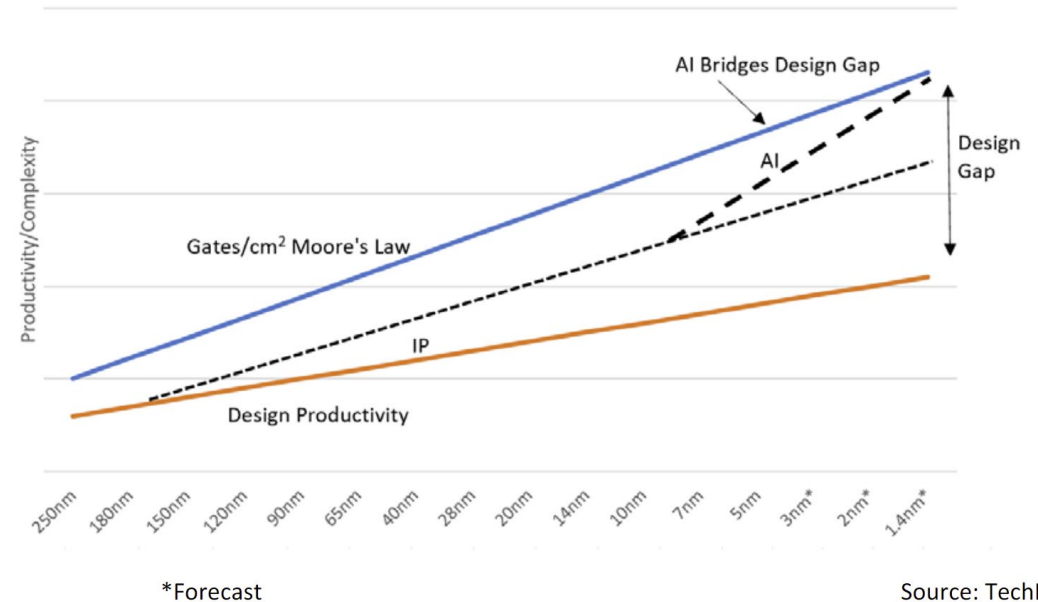

27.3K

Shortage of engineers in the US workforce by 2030

[Shortage of Tech Workers - Semiconductor Industry Association \(semiconductors.org\)](#)

The **capability** and **complexity** of a system is directly proportional to the number of transistors integrated into it

Figure 1: Altering the Design Productivity Gap

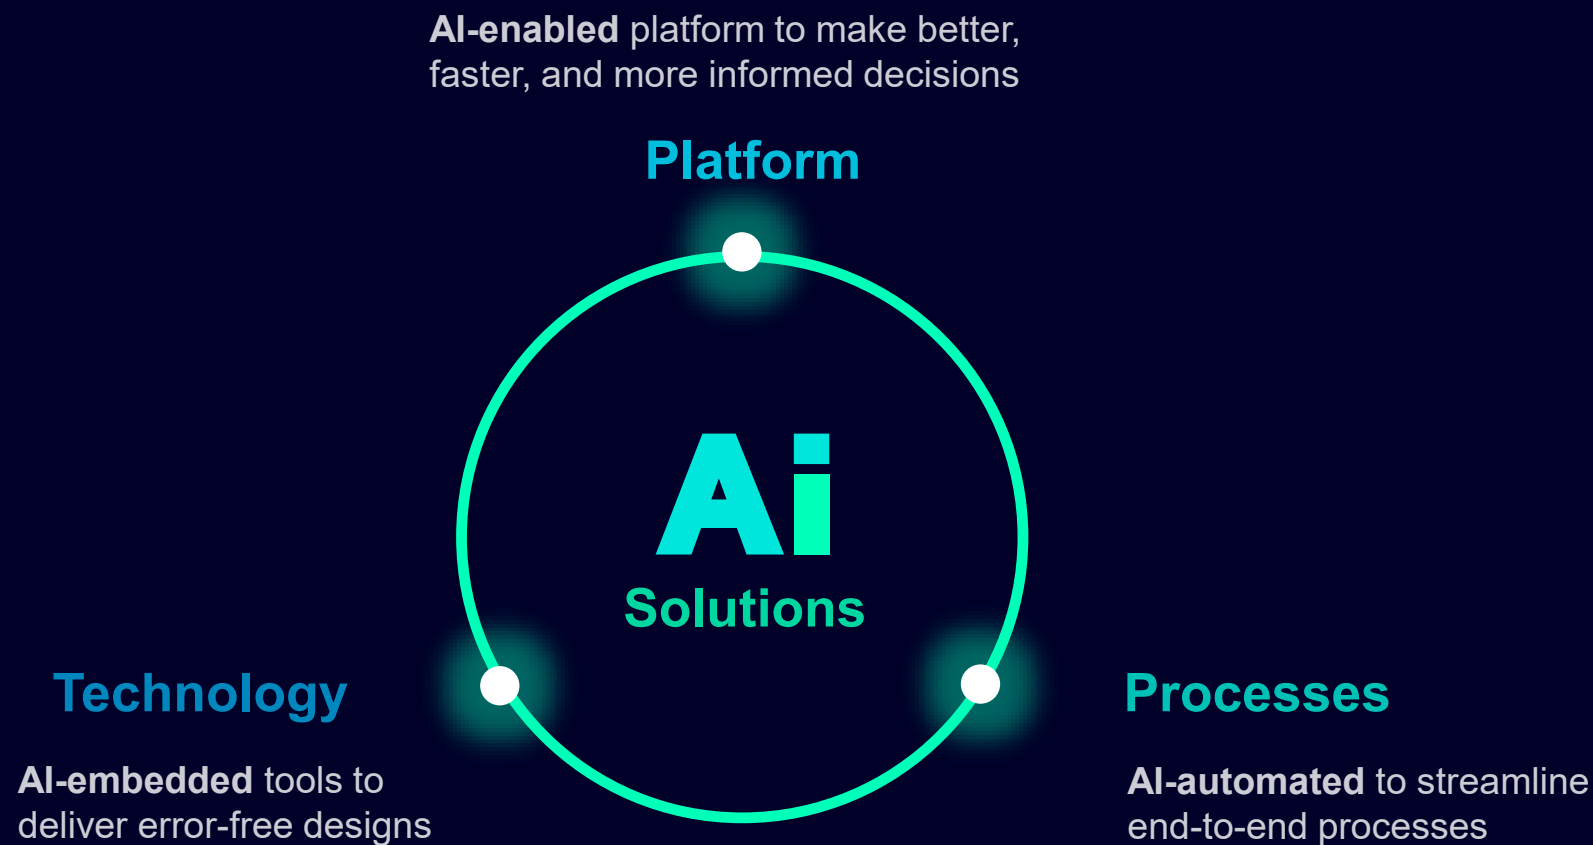

Source: TechInsights.

Advanced EDA tools, new methodologies such as “shift left”, and SIP blocks (internal or 3rd party) have made it possible to close the gap somewhat ... **IT'S NOT ENOUGH**

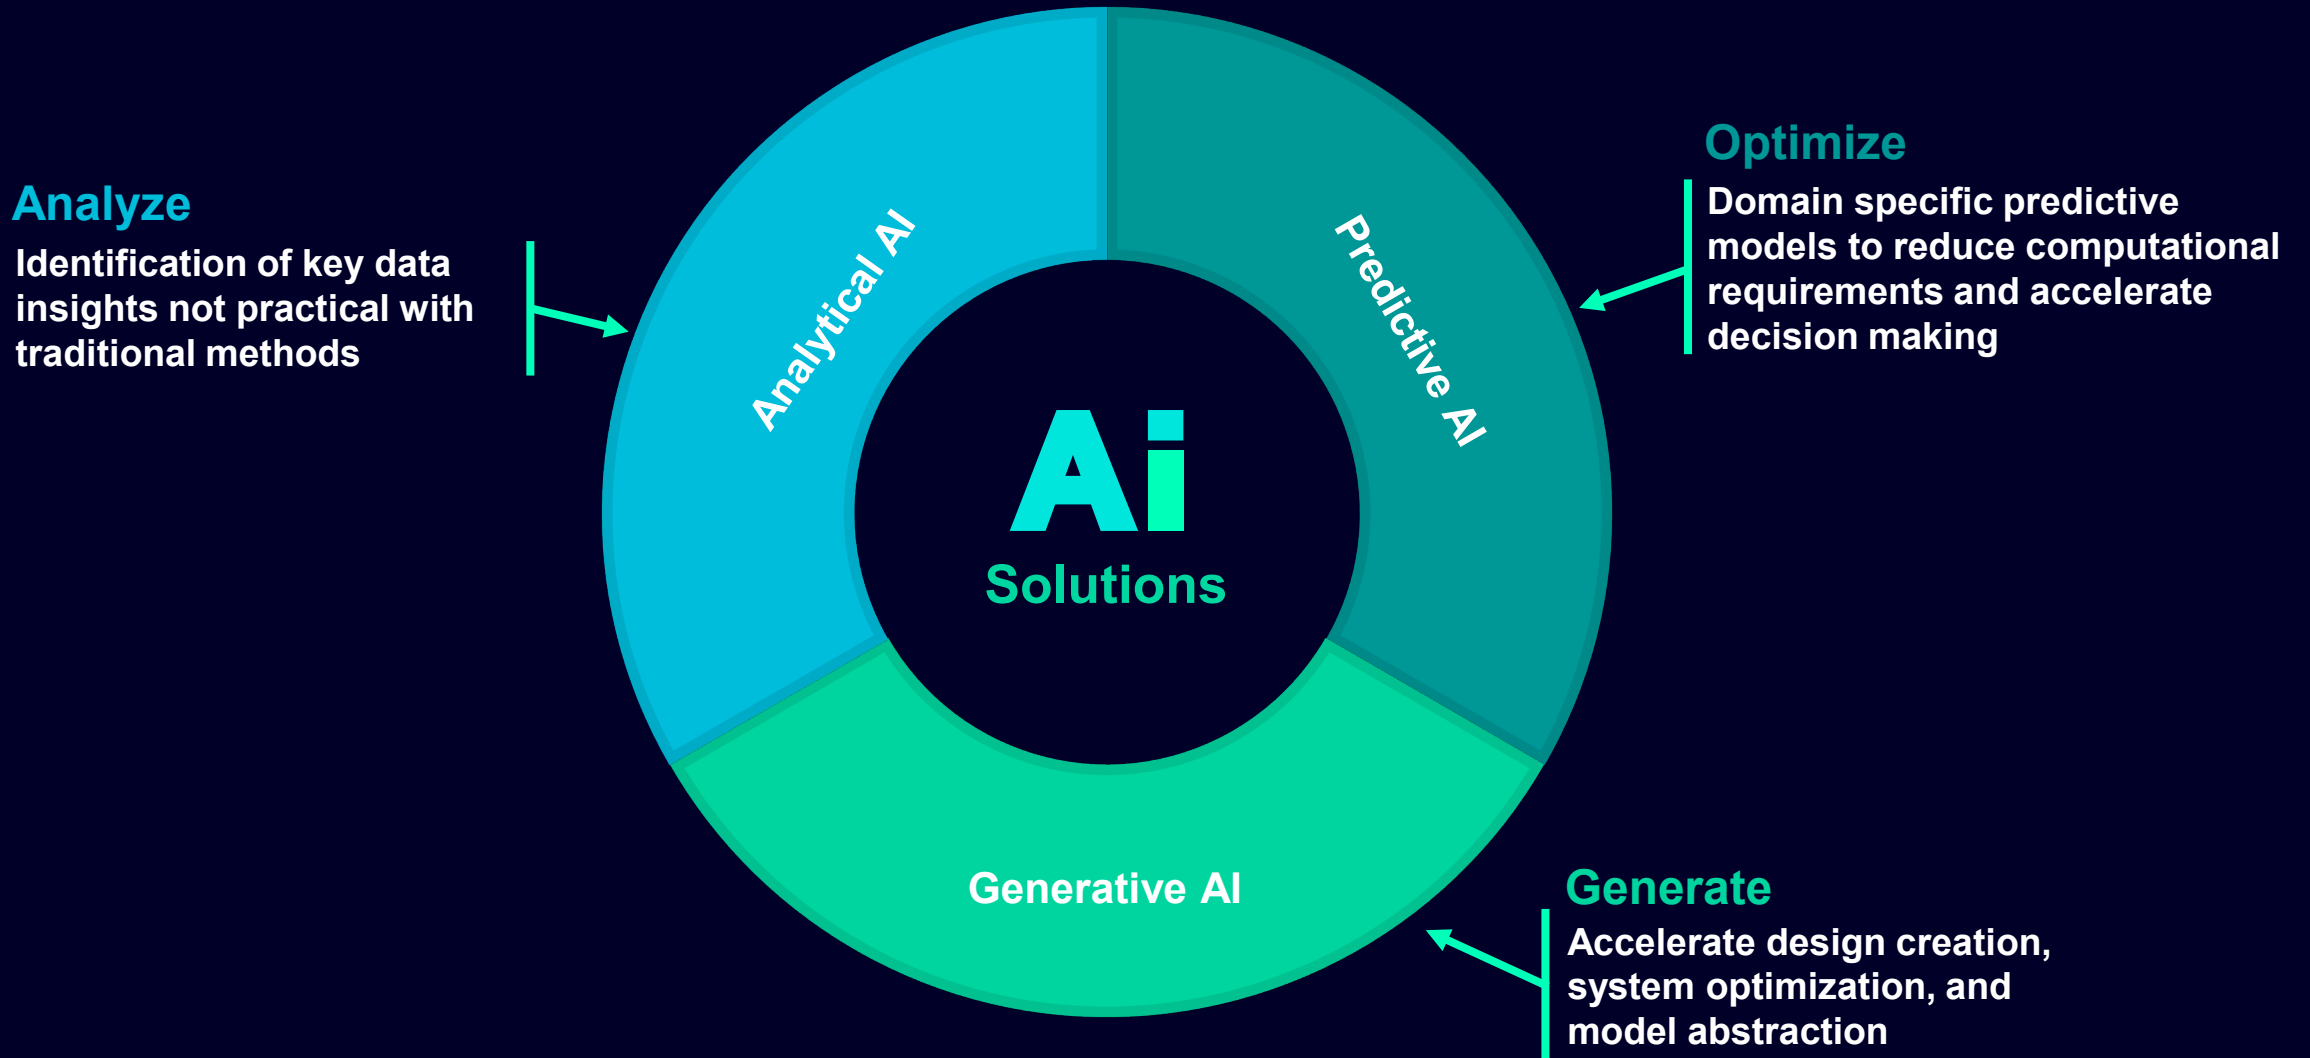

# The Siemens EDA approach to AI

# Siemens EDA AI solutions delivering next generation productivity

**AI based solutions drive organizational knowledge, collaboration and integration**

# AI spans modeling technologies to deliver productivity

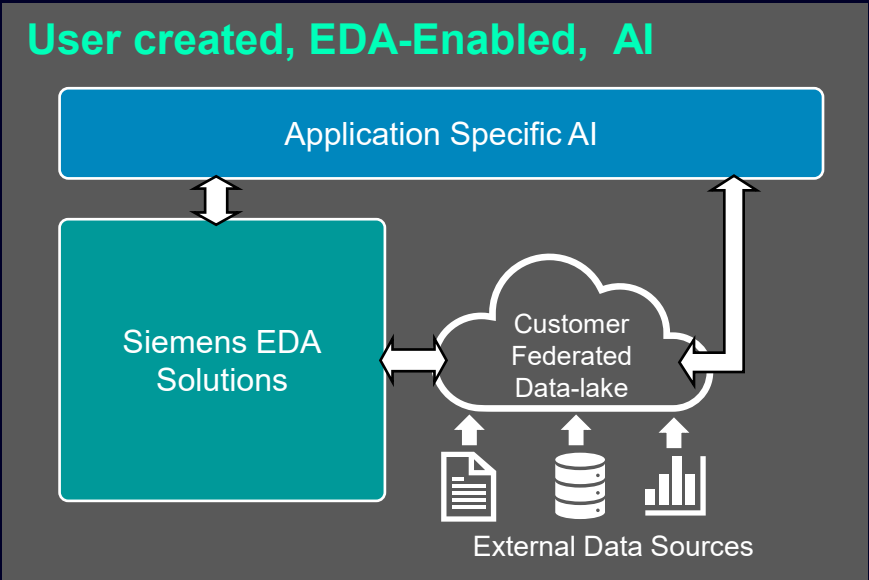

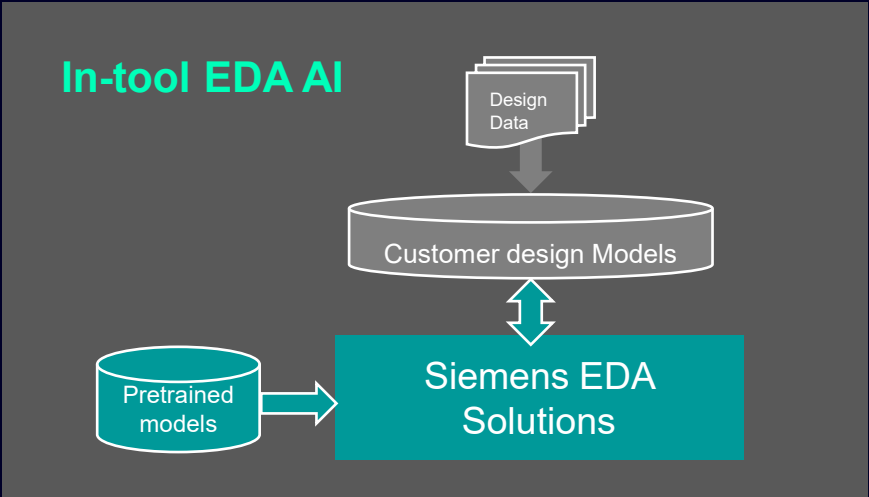

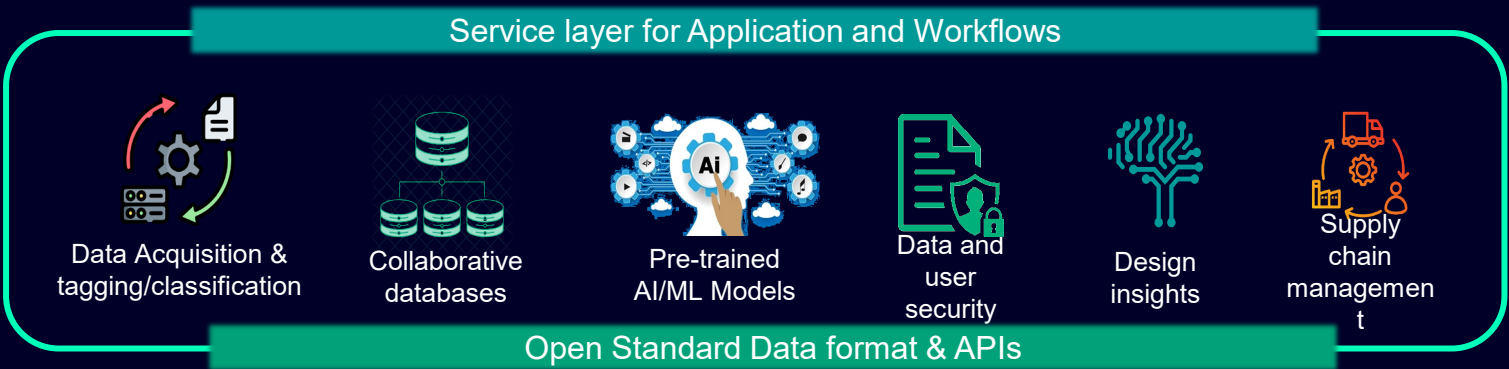

# AI that empowers our users with flexibility and data security

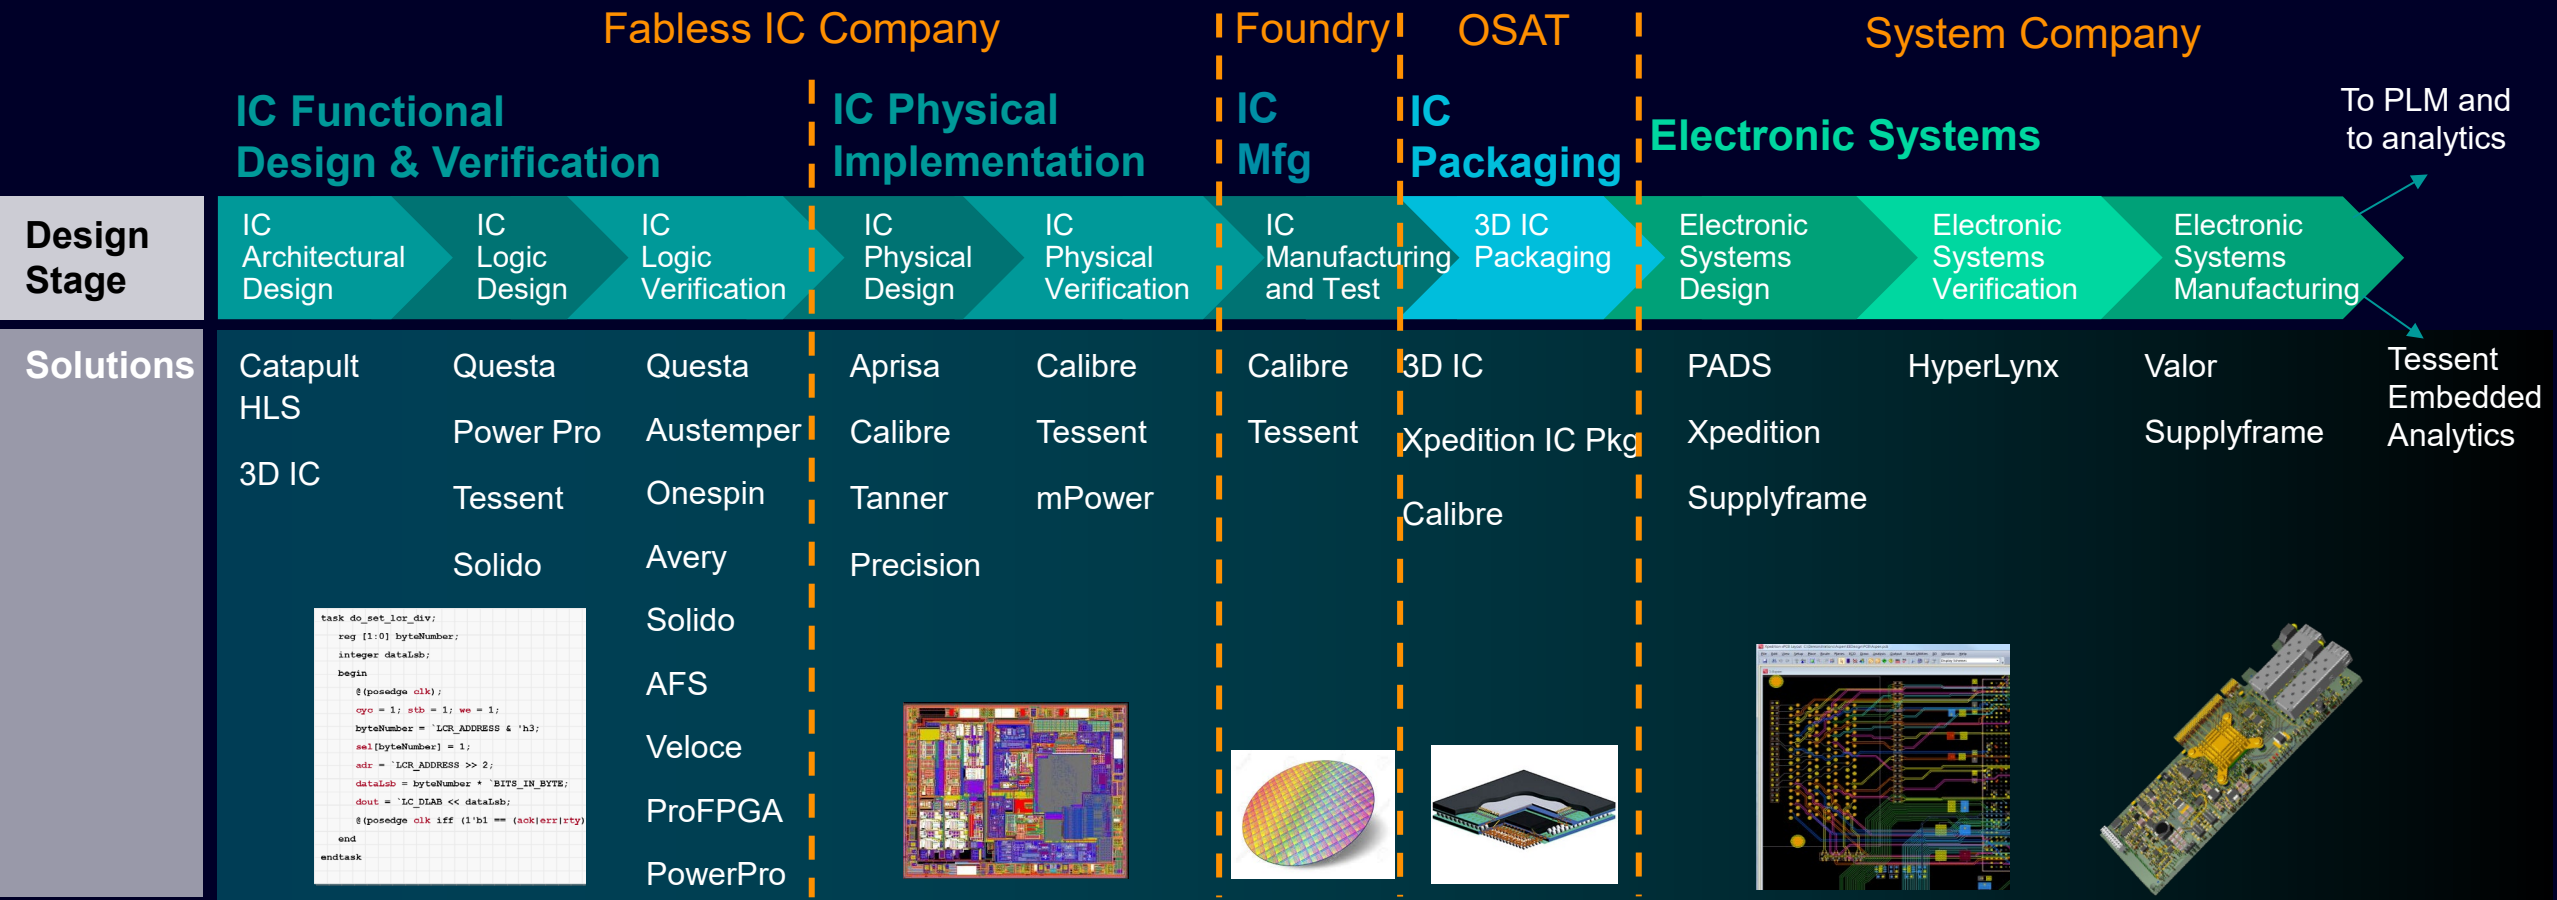

*Protection of customer IP is central to our approach*

## Siemens Ai Solutions

- Acquires data through open APIs where possible
- Data Lake support for distributed data
- Provides service layer to applications
- Comprehensive data security

# Siemens EDA solutions

# Delivering significant gains for customers today

**Broad portfolio application**

**Aprisa**

“Aprisa Macro Placement saved us about 3-4 weeks of floor planning with AI-driven approach”

-Maxlinear, U2U India

**Questa**

“With Questa V block level coverage closure has been reduced by nearly 70% reducing weeks off of total schedule”

-P

**Veloce**

“Saved 13hr Veloce compile time by optimizing memory usage based on compilations”

-Large Mobile Semiconductor Vendor

**Solido**

“6-sigma verification for standard cells, 1,000+ times faster with greater accuracy and coverage using Solido”

-Arriva, Siemens

**Tessent**

“5x Production test time improvement with TBM Adaptive intelligence”

-Amazon, ITC 2022

**Solido**

“50% CPU time reduction, 45% reduced setup time, 60% debug time reduction for .lib verification with Solido Analytics”

-Samsung, U2U 2022

**Xpediton**

“100,000x faster design space exploration for signal integrity with HyperLynx”

**Calibre**

“Up to 15x faster DRC iterations on dirty designs”

-Calibre nmDRC Recon User

**Calibre**

“ML-DRC+ delivers a 21% improvement in hotspot accuracy using Embedded Machine Learning”

-2024

**Tessent**

“10x productivity improvement for DFT architecture”

-Intel, ITC 2021

**More to come...**

# Summary

## SIEMENS EDA + AI

Productivity built on  
a Foundation of  
Artificial Intelligence

### AI-Enabled Solutions

Drive faster results  
with improved accuracy

### AI-Automated Workflows

Drive intuitive tools and  
increased user productivity

### AI-Empowered Engineers

Drive creativity and  
enable rapid innovation

# THANX
